*Astonishing in breadth and depth, the content in this formidable file, as well as the research material included in every one of the scholarly editions available, is superb throughout.*

*. . . This title should be owned by every research library serving serious scholars in the humanities.*

*—Cheryl LaGuardia  
Library Journal, June 2015*

*In the world of scholarly electronic publishing, InteLex continues to get it right, as they have from the beginning: working closely with scholarly editors, selecting high-quality editions to digitize, marking them up carefully and well according to international standards, and permitting libraries either to rent them over the Internet or to purchase, own and locally house them, as we do print editions — all at reasonable prices.*

*I recommend InteLex databases to libraries wholeheartedly, not only because they are superior publications and a good deal, but also because InteLex is the kind of electronic publisher that academic libraries need most in the 21st century.*
